

DOM (Document Object Model)

The DOM **represents a document** with a logical tree.

It allows us to manipulate/change webpage content (HTML elements).

DOM (Document Object Model)

(HTML + CSS)

```
<body>
  <div>
    <h1>Todo</h1>
  </div>
  <ul>
    <li>Eat</li>
    <li>Code</li>
    <li>Sleep</li>
  </ul>
</body>
```

Selecting Elements

`getElementById`

Returns the Element as an object or null (if not found)

05. Selecting Element by ID .mp4

Selecting Elements

`getElementsByClassName`

Returns the Elements as an HTML Collection or empty collection (if not found)

Selecting Elements

`getElementsByTagName`

Returns the Elements as an HTML Collection or empty collection (if not found)

07. Selecting Elements by Tag Name.mp4

Query Selectors

Allows us to use any CSS selector

```
document.querySelector('p'); //Selects first p element
```

```
document.querySelector('#myId'); //Selects first element with id = myId
```

```
document.querySelector('.myClass'); //Selects first element with class = myClass
```

```
document.querySelectorAll("p"); //Selects all p elements
```

Manipulating Attributes

`obj.getAttribute(attr)`

`obj.setAttribute(attr, val)`

}
↓
getters
&
setters

id, class
style
img → src

Manipulating Style

using `classList`

`obj.classList`

`classList.add()` to add new classes

`classList.remove()` to remove classes

`classList.contains()` to check if class exists

`classList.toggle()` to toggle between add & remove

JS

13. Navigation on Page.mp4

Adding Elements

```
document.createElement('p')
```

- `appendChild(element)`
- `append(element)`
- `prepend(element)`
- `insertAdjacent(where, element)`

14. Adding Elements on Page.mp4

Removing Elements

- `removeChild(element)`
- `remove(element)`

JS (Part 9)

Practice Questions

Qs1. Create a new input and button element on the page using JavaScript only. Set the text of button to "Click me".

Qs2. Add following attributes to the element :

- Change placeholder value of input to "username"
- Change the id of button to "btn"

Qs3. Access the btn using the querySelector and button id. Change the button background color to blue and text color to white.

Qs4. Create an h1 element on the page and set its text to "DOM Practice" underlined. Change its color to purple.

Qs5. Create a p tag on the page and set its text to "Apna College Delta Practice", where Delta is bold.
